

# Docarréminos

Un jeu de domino possède 28 pièces, il y a donc 8 fois chaque numéro ( de 0 à 6)

Un docarrémino est réalisé lorsqu'en utilisant certains dominos on forme des carrés composés d'un même chiffre.

Exemples :

Un docarrémino de 0

2 docarréminos de 0 et de 5

4 docarréminos de 0 ,1,5et 6

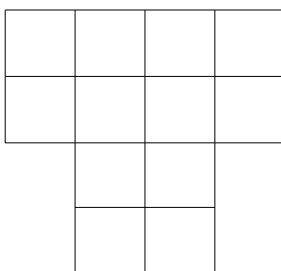

Avec les 28 dominos, on peut former 2 docarréminos par nombre , cela donne 14 docarréminos .

**BUT :**

**Il faut paver les formes proposées  
uniquement avec des docarréminos**
